

ICS ELEMENTS: COMMON RESPONSES

EMS UNIT *ONLY*

With a single EMS Unit response, EMS personnel perform all functions associated with the common ICS elements of Command, Safety, Triage, Treatment, and Transport.

"COMBINED" EMS RESPONSE: MVA 1-4 VICTIMS

Multi-agency response is common to many EMS incidents. A Motor vehicle accident, with personal injury, is representative of these situations. Command will either be assumed by personnel from the the jurisdiction having primary incident responsibility or Unified Command may be established.
